“Dear Uncle Wes, I am so grateful for your love - growing up with my cousins, and spending summers on the farm. I remember hoeing weeds out of the beans 10 cents a row? ha ha and bottle feeding lambs and playing with the kitties! I learned from you to enjoy and work the land and I continue to garden as it does ground you to the earth and nurture you. You were always working but when you came home you sat in the kitchen watching the weather and all us kids could climb all over you as much as we wanted! We always knew that we were loved and that is a wonderful thing. My memories of this special time have sustained me through hard times and I will miss you but hold you in my heart forever. My mother Phyllis enjoyed your love for each other and you were at her side in life and especially through her final stages of cancer 34 years ago. You have touched countless lives and always giving. The world was a better place with you in it and we hold your standards with love and have giving natures. We are going miss you Uncle Wes.”
